Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-9 in the reply filed on 6/17/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 1-9 and 20-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Dible et al (US 6239403).**

Dible et al disclose a method of controlling the RF power to a multi-segmented electrode chuck (Fig 2 and 5) with a single RF power supply delivers individually controlled power to different concentric electrode zones by controlling variable capacitors so as to have a localized control of plasma density in response to installed sensors (Abstract, Col 1 lines 7-14, Col 2 lines 10-20, Col 3 lines 32-47, Col 4 lines 19-25, Col 5 lines 37-58 and Col 6 lines 13-22).

4. Claims 1-3, 7-8 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Liu et al (US 2003/0038112).

Liu et al disclose a method of controlling the RF power to a multi-segmented electrode in a plasma chamber (Fig 1, 2A, 2B and 2C) with independent RF power supplies delivering individually controlled power to different concentric electrode zones, so as to have a localized control of plasma density in response to installed sensors (Abstract and Paragraphs 5-7, 27, 40, 42 and 81).
